Summary

Backend Software Engineer with approximately 4 years of experience in Go, Node.js, and TypeScript, building distributed systems, REST APIs, and critical integrations. At Luizalabs (Magalu), develops logistics services supporting millions of monthly transactions and peaks of roughly 250 req/s. Experienced in RabbitMQ, Kubernetes, observability, and production operations.

Professional Experience

Software Engineer - **Luizalabs (Magalu)** - Remote, Brazil - Nov 2024 to Present

- Built Go and Node.js microservices, APIs, and BFFs for inventory, Magalu agency pickup, and labels for third-party orders (3P), supporting millions of monthly logistics transactions.
- Implemented RabbitMQ-based workers and event-driven workflows, increasing resilience and asynchronous throughput capacity.
- Supported peaks of approximately 250 requests per second during major sales events, maintaining high availability with zero system-wide failures.
- Maintained more than 10 backend services and integrations with Kubernetes, Helm, Argo CD, and GitOps deployments; used Grafana and Datadog for observability and supported code reviews, on-call, incident response, and RCA.

Software Engineer - **SBsistemas** - Marau, RS, Brazil - Apr 2024 to Nov 2024

- Developed Go backend services and tax integrations for Brazilian electronic freight documents (CT-e), implementing complex business rules.
- Optimized PostgreSQL queries and routines with a focus on platform performance and operational reliability.

Software Developer - **DataIntegra** - Passo Fundo, RS, Brazil - Aug 2022 to Apr 2024

- Developed secure integrations between major Brazilian hospital systems, exchanging registration records, medical reports, and sensitive data.
- Built features and maintained critical applications using Node.js, TypeScript, and Docker, supporting healthcare data exchange.
- Delivered an approximately four-hour Clean Code workshop for UPF students, using Node.js and TypeScript examples.

Customer Support / Implementation - **Vip Informática** - Serafina Corrêa, RS - Jun 2021 to Aug 2022

- Deployed business software and executed relational database migration scripts in customer environments, supporting system rollouts.

Technical Skills

Languages and runtimes: Go, TypeScript, Node.js, Java
Databases and caching: PostgreSQL, Redis
Cloud and infrastructure: Docker, Kubernetes, Helm, Argo CD, GitOps, CI/CD
Messaging: RabbitMQ, event-driven architecture
Observability and operations: Grafana, Datadog, on-call, incident response, RCA, post-mortems
Architecture and practices: microservices, REST APIs, BFFs, Clean Architecture
Testing and quality: unit testing, integration testing, Test-Driven Development (TDD)

Education

Technologist Degree in Systems Analysis and Development - Universidade de Passo Fundo (UPF) - 2020 to 2022
Courses and certifications: Ignite Node.js - Rocketseat (Feb 2024)

Languages

Portuguese: native | English: basic (technical reading)
